

## REDSHANK IT HARDWARE SUPPLY THAT'S RIGHT FOR YOU

*We support your people,  
not just your technology.*

# IT HARDWARE SUPPLY

### HAVING THE RIGHT TOOL FOR THE RIGHT JOB IS A STATEMENT THAT YOU CAN'T REALLY ARGUE AGAINST ISN'T IT?

It doesn't matter if your people are electricians, footballers or work in the accounts department, they all need the right tools for their roles.

That rings true for laptops, desktops and tablets today, more than ever. The choices presented to you when looking for a new device can be baffling and that's without having to ensure that your new choice is compatible with your systems, such as the version of accounting software you use.

That's where we come in. Our team of experts, including your Account Manager, are always on hand to guide you through the minefield of options.

#### **New Premium Brands**

We can supply HP, DELL, Apple, Microsoft and all other leading brands at competitive pricing.

#### **Custom Build**

Our custom build solutions boast the latest and most advanced components, keeping your business at the forefront of technology. Experience increased productivity and efficiency with hardware that perfectly aligns with your requirements, while also benefiting from the peace of mind that comes with a full warranty.

With us, you not only save on initial costs but also enjoy the longevity and reliability of our products, making our custom-built PCs and servers the smart choice for your business's success.

#### **Refurbished**

We offer a premium range of refurbished mobile phones, tablets, laptops and PCs. Each device undergoes rigorous testing and repair, ensuring top-quality performance at a fraction of the cost of "new".

Whether you need the latest mobile technology or powerful computing solutions, our refurbished options offer excellent value & environmental sustainability.

We are able to supply laptops, desktops and tablets, either as a 'direct shipment', meaning the device is shipped directly to you for you to set up, or we can do the setup for you for a small charge.

Typically, we provide the following as a part of the device setup:

- Correct user profile
- Install the correct software
- Install and configure security suite
- Install and configure remote access
- Remove all of the *bloatware*

*Bloatware* = When you buy a new PC or laptop you would expect it to be raring to go. However, this isn't the case with producers shipping your new device with trialware, utilities and pre-installed software that can impact on the software that you need for your people to do their job. We can remove all of this for you.
